

DANEMILL RE OPENING RISK ASSESSMENT

Activities Covered by this Assessment	Reopening of schools during COVID 19 (June 2020)		
Location	Danemill Primary School	Organisation	DISCOVERY

Note: A person specific assessment must be carried out for young persons, disabled staff and new and expectant mothers if appropriate

This risk assessment is for guidance only and must be adapted to include any further hazards and subsequent control measures.

Once completed, please ensure final risk ratings are added.

Every setting should carry out a risk assessment before opening. The assessment should directly address risks associated with coronavirus (COVID-19), so that sensible measures can be put in place to control those risks for children and staff. As a trust we have worked collaboratively with heads in order to consult on health and safety matters relating to opening. SLT in turn consult with school colleagues, best placed to understand the risks in individual settings.

If a person becomes unwell during the day the school will refer to government guidance found [here](#).

Attendance: No one with symptoms should attend a setting for any reason. Eligible children – including priority groups - are strongly encouraged to attend their education setting, unless they are self-isolating, or considered to be [clinically extremely vulnerable](#). Children categorized as [clinically vulnerable](#) should follow individual medical advice). Where the child, young person or staff member tests positive, the rest of their class or group within their childcare or education setting should be sent home and advised to self-isolate for 14 days. Further guidance about self-isolating is found [here](#).

It is advised that schools carry out an inspection of the premises before opening and use the COVID Safe Schools – Phased Return to School Toolkit to record the findings.

During this activity, what could go wrong resulting in an emergency situation?	<ol style="list-style-type: none"> 1. Child displays symptoms with CV19 2. Child from teaching group who has been sent home becomes confirmed case. 3. Staff becoming ill and self-isolating.
How could this emergency situation be prevented / controlled?	<ol style="list-style-type: none"> 1. Isolate child until collected. 2. All children in that teaching group to be sent home and told to self-isolate for 14 days. 3. Follow self-isolating guidance, ensure that reporting of illness procedures well understood.
Who should respond to a potential emergency situation and how? Have staff been trained to respond to this emergency situation?	<ol style="list-style-type: none"> 1. Staff to supervise child until collected where 2m rule cannot be implemented PPE to be worn. 2. Make staff aware of guidance in link below, develop guidance on internal monitoring of staff and pupils on self-isolation and student attendance recording. 3. Follow guidance: https://www.gov.uk/government/publications/coronavirus-covid-19-implementing-protective-measures-in-education-and-childcare-settings/coronavirus-covid-19-implementing-protective-measures-in-education-and-childcare-settings Consider reallocating staff or capacity of

DANEMILL RE OPENING RISK ASSESSMENT

Potential Severity of Harm	High Death, paralysis, long term serious ill health.	Medium	High	High
	Medium An injury requiring further medical assistance or is a RIDDOR incident.	Low	Medium	High
	Low Minor injuries not resulting in any first aid or absence from work.	Low	Low	Medium
		Low The event is unlikely to happen.	Medium It is fairly likely to happen.	High It is likely to happen.
Likelihood of Harm Occurring				

Risk Rating Definitions	
Low	This is an acceptable level of risk. No further controls are required as the risk rating cannot be reduced any further. However, it is advised that continual monitoring occurs in order to ensure that no changes / deviation of control measures occur.
Medium	It is advised that further controls are implemented to reduce the risk rating to as low a level as possible. If the risk cannot be reduced to lower than a medium, then on site monitoring should occur to ensure that all stipulated controls are being adhered to.
High	This is an unacceptable risk rating. Urgent interim controls should be implemented to reduce the risk so far as is reasonably practicable. If the risk rating cannot be reduced to lower than a High , then a documented safe system of work should be implemented to control the activity. It may be necessary to seek further professional advice. Serious considerations should be given to the validity of carrying out the activity at all. Regular monitoring of the activity should occur.
